
play and recreation surfaces **EVERPLAY** INSTALLATION INC.

Henry Helps

Henry started in the playground industry with Ressco Recreation Inc. in January 1980 as a sales and marketing representative and learned the basics from ground up. This included design, manufacturing and installation of the play equipment.

From January of 1984 to 1993, he worked for Children' s Playground Inc. in their sales department, being responsible for sales in Southern Ontario. His duties included the taking of playground from initial concept to just prior to the Children arriving. This included compliance to the standards of the day for playgrounds. During that time, he took an AutoCad drafting course to aid in the design of all the playstructures he sold. This was very helpful in designing many of the complex structures that Children' s Playgrounds sold.

In 1993 he left Children' s Playgrounds and begun a short stint with Hilan, after which he learned the basics of playground inspections with Playspaces Inc.

He joined EVERPLAY Installation Inc. in January of 1996 as a sales representative, which opened up a whole new world for him in the surfacing industry. He was involved not only in the sales and administration of the company but as well, the many aspects of the installation of the poured in place surfaces for playgrounds and water play facilities.
